Think Fun Maths, Think Shenmo Abacus Mental Math

About Us

Established in 2019, Port Harcourt, Rivers state, covering 8 states with over 5000 students, Shenmo Nigeria is amongst the leading Abacus and Mental Arithmetic Institute with a rapid growth of cognitive programs targeting full brain and holistic development of a child.

A franchise to Shenmo Education, Beijing China, in 2018, we believe that 'self enlightening' is the optimal way to unleash the full learning potential of a child. Our programs are refined pedagogically and constantly updated to our times. These highlight the importance we place on the child's moral education, joyful learning and effective techniques in learning ability.

Our Mission

With a mission to help children reach their full potential and to contribute to the well-being of the society, Shenmo Nigeria follows the educational concept of "Equality, Respect, Trust, Admiration, Attention, Motivation", and aims to instil in students a Joyful Education.

Our Vision

Our vision in Shenmo Nigeria is to support every nursery, primary and secondary school student with the necessary tools and techniques needed enjoy mathematics and banish phobia completely.

The Abacus History

Abacus, one of the significant calculation methods with a crucial contribution to the development of China, originated 2,600 years ago. Known as the Fifth Great Invention of China, abacus was named as the “101 inventions that changed the world” which have promoted the development of human society, within which the abacus ranks the first.

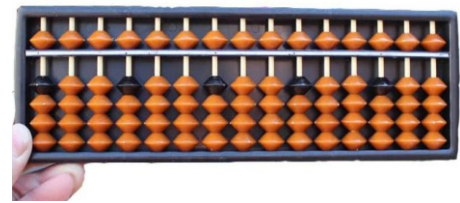

While ancient Greek mathematics focused on theorem proving, ancient Chinese mathematics focused on algorithm development, particularly for solving equations; it intended to address practical issues and was characterised by algorithm and mechanisation, in other words, Mathematical Decomposition. From which, students who were taught abacus have an easier time grasping Mathematical topics and thrive in Science due to their innate problem-solving skills. Abacus and Mental Arithmetic has aided people in developing their mathematical skills and interests, and its educational implications in other subjects are highly significant.

The Benefits and Function of Abacus and Mental Arithmetic

Mathematical skills lay a secure foundation for higher classes. The primary objective of the Abacus programme is to enhance the brain power upgrading the brain skills of the children. Higher academic performance not only in arithmetic but also in all subjects.

It is also important to know that the brain gets stimulated through our sense organs, and there

are sensory nerves and motor nerves which carry the information from the organs to the brain and also from the brain to the organs, the input for the brain has to come through your organs, so the beads are designed in such a beautiful way that when the children handle it with their fingers the nerve endings get stimulated which in turn stimulates the cells which are in the brain. While everyone knows how handy it is to use an abacus for math, there are several hidden benefits of abacus that help a child's overall development without anyone noticing:

ENHANCE MEMORY CAPACITY

Through aural Abacus and Arithmetic practices as well as flashcard exercises, the child's memory capacity is enhanced as these activities train the child to process images and numbers quickly while retaining and recalling them, this enhances the 'Short Term Memory' Scoop which becomes the foundation for 'Long Term Memory' retention.

WHOLE BRAIN DEVELOPMENT

Our unique and patented two-hand approach trains simultaneous bead movement on both hands. Through constant practice, the two-hand movement stimulates the development of both the right and left hemispheres of the brain, leading to a more rounded and balanced brain development.

PROMOTES SPEED & READING SKILLS

Abacus training involves speed reading and processing huge chunks of numbers in order to perform quick calculation on the abacus. The technique of 'grabbing' or visualising huge chunks of numbers for mental processing becomes a mental skill that can also visualise huge chunks of other information. Through constant practice, this technique of speed reading will prove beneficial to any subjects the students tap upon.

IMPROVES CALCULATION WITH ACCURACY

Mental Arithmetic, which is the culmination of Abacus training, is achieved when the child is so skillful with the operation of the abacus that a child is able

to envision in the mind. Children's calculation speed increases and they also make fewer mistakes in recalling. This aids not just the calculation but also the accuracy of the recall.

FOCUS / CONCENTRATION / ATTENTION

Children working on the abacus requires a high level of concentration and focus. When doing calculations on the abacus, the child focuses all his attention on bead movement and the reading of numbers, his mind does not stray or wander and he knows the importance of a disciplined mind. Hence, abacus training is a good way to train a child's concentration skills and focus, the long-term benefit is longer attention span and also heighten attention to details.

ARITHMETIC SKILLS AND STRESS AVOIDANCE

Cultivating the children's arithmetic skills from an early age will shorten the learning process when they progress to Primary school. Most of our students find it easy to learn and score well in Maths taught at higher level and this minimises the stress related to kids who did not build a good foundation or computation skills required. Our students gain confidence and score well in both Maths and Sciences and their parents do not suffer anxiety issues relating to their child's academic results and the need for tuition.

COORDINATION AND MENTAL ORGANIZING SKILLS

In our Abacus class, the student's cognitive abilities are engaged simultaneously: the reading of numbers, the recitation of formulas, the active response to questions and the movement of beads greatly enhanced the coordination skill and this in turn prime them to mental organise or 'multi-task' through their mind with ease.

PIQUE FOR LEARNING

Learning of abacus also benefits the learning of other subjects, for example, the visual spatial nature of abacus will aid the study of Geography and Physics and the statistical concept of abacus will aid the study of general Sciences through strong analysis of data. Abacus and Mental Arithmetic also activates

both hemispheres of the brain and promotes dexterity in movement and responses as it also trains one's motor-neuron reflexes, which are advantageous to one's dexterity when playing an instrument, typing, or working on fine crafts with one's fingers.

INCULCATES PERSEVERANCE AND DETERMINATION

The frequent hand movements in abacus coupled with the recitation of the formulae makes the children more articulate. Through constant feedback from the trainer, the children gain a sense of self-awareness and the ability to evaluate their own performance. It motivates them to strive harder for better results, cultivating the virtue of diligence and perseverance in them from a young age.

Why Choose Shenmo Abacus Nigeria?

- We are a franchise to Shenmo Abacus Institute in china with a complete curriculum for developing young minds.
- We are committed to learning values to ensure your students/children get the best of speed calculations and abacus skills.
- We use creative teaching patterns to promote thinking and problem-solving ability.
- We have professional, qualified and trained instructors that are committed to quality education and academic excellence.
- We have a fun-filled teaching and learning materials that are designed to keep our students engaged throughout the lessons.
- We have a specialty in training students to look at a problem and perform mental calculations before they choose to write it down, which requires a high concentration and focus on the numbers.

Our Services To The Nigerian Educational Sector

THE FIRST LEVEL PARTNERSHIP PROGRAM FOR ALL NURSERY, PRIMARY AND JUNIOR SECONDARY SCHOOLS IN NIGERIA

The 1st level partnership offered by Shenmo Nigeria is mostly suitable for

private schools located in states and cities where we have our trained instructors teaching students directly. Students from various schools will be able to learn Shenmo abacus mental math either as a subject during school hours or as an extra-curricular subject. In which ever way you chose to sign up, we are committed to make sure your learners become abacus geniuses.

Our visit to private schools under the 1st level partnership scheme is once or twice a week depending on the population size of your school. We have a flexible payment plan that can cover schools in the rural or urban areas.

To get started with us as a first level partner, kindly request to have a FREE TRIAL CLASS with us.

THE TEACHERS TRAINING PROGRAM/ SECOND LEVEL PARTNERSHIP SCHEME FOR PRIVATE AND GOVERNMENT EDUCATION SECTOR IN NIGERIA

With a mission to promote the abacus system of calculation for Nigerian Children, Shenmo Nigeria has designed a flexible scheme for teachers and educators all over the world. This is referred to as the 2nd level partnership and it suitable for schools that are located in states with zero Shenmo abacus centers.

Why choose us as a second level partner:

- Professional Teacher's Training.
- Complete System of Business Model Fully Provided.
- Professional Training Given by Dedicated Staff.
- Relative Stability in Current Uncertain and Ever-Changing Market Trends.

To learn more about our teachers training/2nd level partnership scheme, kindly visit our learning centre.

ONLINE/OFFLINE ABACUS CLASSES AT THE SHENMO KIDS LEARNING CENTRE

The Shenmo Kids Learning center is an exciting and fun learning environment where kids explore and master the Art of Abacus Mental Math and other extracurricular activities such as: E-Reading, Coding, Science, Bible and Scrabble club. All our activities are age appropriate and aimed at providing different channels to achieve learning in the best way possible. The Shenmo learning center provides an atmosphere that enhances, equips and empowers the learners and instructors to interact; promotes critical thinking in resolving every given task within a friendly learning environment. Our classes are held onsite and off-site.

Our registration for children starts from the ages of 4 to 14 years and gives children the opportunity to socialize and boost their confidence/self-esteem while improving their academic performance. Our classes are held only on Saturdays and during the holidays. We also run different batches of our abacus class and other extra-curricular activities.

For more details and how to brand your school as a Shenmo Learning Centre, kindly reach out to Ms Ginika on 08035726931 or visit us @ Flat 1, Jet Estate, Aeroplane Drive, Off Abuloma, Odili Road.

Testimonials

Clover Hall International School has run the Shenmo Abacus program for the past 4 years with tremendous results. Our learners are always excited on our abacus days. We've had learners go through the different levels of the program after learning and taking their promotional exams. We have advanced learners who can even teach the lower levels. That is an awesome achievement for our learners. In our school, mathematics is no longer an abstract concept but concrete and real. Our learners see and visualize their numbers and their movements, setting the foundation for future advanced mathematics. Well done Shenmo Abacus team.

NYIEDUM UFOT
Director, CHIS

COACH KIKE DAVIDS
Director, Trendsetter
Model School, Uyo

Some years ago, I decided to start a school that develops lifelong learners and raises smart kids in mathematics and science who can compete globally. Shenmo Abacus Program has been one of the tools in achieving this vision. It has given our school a global exposure and recognition. Shenmo Abacus Program is one of our Unique Selling Point as a school. It has drawn many parents and learners to our school. For our learners, Shenmo Abacus Program has been one of the best things that happened to them. Here are some of the benefits to our learners:

- Shenmo Abacus Mental Maths has helped to develop their mental calculation skills by teaching them to perform arithmetic operations in their head.
- It has improved their problem-solving skills: Abacus Mental Maths helps children develop their problem-solving skills by teaching them to think logically and systematically.
- It has helped to boost our learner's confidence and self-esteem.
- Learning Abacus Mental Maths requires concentration and memory. Shenmo Abacus Program has helped our children develop concentration skills. It has also helped to improve their focus and attention span.

Overall, Shenmo Abacus Program has been a plus to The Trendsetters Model Schools. The program has been a fun and engaging way for our learners to develop their mental calculation skills, boost their confidence, and improve their overall cognitive abilities.

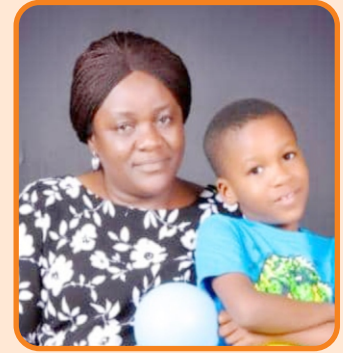

“ The introduction of Shenmo Abacus into the curricular activities of our great school INSTINCTS ACADEMY has been one of our best decisions as a school which has given us a giant stride especially in Mathematics as well as Quantitative reasoning and calculations among all our engaging pupils. This system of mental calculation measure has aided the pupils to carry out calculations simply by visualisation and mental picturing of facts and figures. Abacus fun- learning nature has aided most of our engaging pupils to overcome maths phobia. In short, the benefits of Shenmo Abacus cannot be overemphasised nor eroded.”

OLUFUNKE ADUBOR
Proprietress, Instinct Academy

“ Thanks a bunch for giving these kids a new lease of life. I will be every grateful for your support to my son during the inter-school competition for Porthacourt school”. My son has totally improved in his math and always looks forward to coming to the Shenmo learning centre.”

MRS CHRISTY EBELE UWALAKA
Parent

“ I always enjoy the abacus class and meeting for parents”. It has been very useful to understand what my child is going through in Shenmo. And know how to guide him and encourage him when he encounters difficulties. It also creates a better awareness of my influence on his long-term development and growth.”

MRS OFURUM CYNTHIA
Parent

“ I am using this medium to thank the Shemo Abacus Team. They are indeed doing a good job, and the children are always excited to participate. The parents are grateful too as they can see how fast their ward/s can add up numbers easily. I will recommend Shemo Abacus Mental Math any day, anywhere.”

ROBERTA IDE
Proprietress, Eulex Education Centre, Port Harcourt.

MRS NANCY TAIWO
Parent

“ My daughter, TENIOLA, has been with Shenmo for about 1 year plus”. She is enrolled in the online session of Mental Arithmetic. During this time, we can see that apart from her calculation skills she has made great improvement in her confidence, focus and concentration. Through out her 2 years at Shenmo, what impressed me the most was the dedication and patience of the teachers. If students make mistake in their work, it's part of the learning journey. They are very encouraging and positive towards the student's learning journey and mental well-being. Assignments and daily practice are submitted through a WhatsApp chat group and the teachers' comments on their work. I can truly feel the effort and patience that the teachers have put in, in order to achieve this. Through this chat group we witnessed the improvement of not only our child but other children as well.

A Message from the Director, Shenmo Abacus Nigeria

The awareness of what ABACUS is and can do in the everyday life of young children is close to going viral and with the passion surrounding everyone on Shenmo Nigeria team, math phobia will no longer be an issue for children.

ENGR. BEN NZEH

The Team

Meet Our Principal

Mrs. Shirley Ben Nzeh

Mrs. Shirley Ben Nzeh holds a Masters degree in Information Systems Management from the University of Huddersfield, United Kingdom. She also holds a BSc degree in Computer science from Igbinedion University and a Post Graduate Diploma on Early Childhood/ Primary Education from the Ignatius Ajuru University of Education. She is a trained and certified abacus instructor from Shenmo headquarters, Linyi, China and also the president of Nigeria Branch of International student's alliance in China.

With over five years of running Shenmo abacus in Nigeria, Ms Shirley as often called by many has created a balance for fun learning using the abacus system of calculation. She is a passionate teacher and lover of children. Her journey in Shenmo abacus maths started with only 2 students in 2019 and has increased to over 5000 students across different cities and states in Nigeria.

FREQUENTLY ASKED QUESTIONS

DOES MY CHILD HAVE TO BE FAMILIAR WITH MENTAL MATH OR ABACUS BEFORE JOINING A CLASS?

No. Most of our students start fresh, without any previous experience.

WHAT DOES A STUDENT NEED TO BRING TO EACH CLASS?

Each student needs his or her own Abacus learning kit containing the abacus tool and books.

HOW OLD DOES A CHILD HAVE TO BE TO START LEARNING MENTAL MATH?

Students start learning Abacus and mental math as young as 4 and 5! The starting age is flexible and depends on the student, but it is ideal to get students started before age 10 or 11.

HOW OFTEN ARE CLASSES?

Once a week either in schools or at the learning center.

HOW MANY STUDENTS ARE IN EACH CLASS?

We keep our classes small, with a minimum of 10 students and a maximum up to around 15-20 students per class.

HOW IS THE CURRICULUM STRUCTURED?

The whole program has 6 levels, which covers addition, subtraction, multiplication, and division. Depending on the age and practice that a student puts into it, it may take up to two sessions to finish one level.
